**Subject:** RE: RM 10.9 QAPP - Revised Porewater SOPS

Okay, I spoke with Marc Greenberg and he thinks the approach outlined below sounds reasonable. He was going to recommend the second centrifugation that I know you also considered, but the 72 hour settling period should also be effective.

CDM – please let me know if you have any other comments on the SOP so the CPG can proceed with analyzing these samples.

Thanks

**Subject:** RM 10.9 QAPP - Revised Porewater SOPS

Stephanie:

The CPG has modified the Porewater SOP by removing the filtration step and replacing it with a 72 hour settling period after which pore water will be decanted and analyzed.

The CPG is ready to proceed once you have reviewed and approved the attached revised SOP.

Please contact us with any questions.

Thnak you.
